Team

Our team is constantly changing, with each version created by a slightly different group. Here are all the people that have ever worked on Bloom:

Eberhard Beilharz (SIL International): Linux Programming
John Hatton (SIL International): Program Manager, UX Design, Programming, CSS
Phil Hopper (SIL International): Programming
Marlon Hovland (SIL International): Documentation
Susanna Imrie (SIL International): Training Videos
Gordon Martin (SIL International): Programming, CSS
Steve McConnel (SIL International): Linux Programming
David Moore (SIL International): Linux Programming
Sue Newland (SIL International): Testing
Marvin Nichols (SIL International): Testing
Andrew Polk (SIL International): Programming
John Thomson (SIL International): Dev Lead, Programming
Len Wallstrom (SIL International): Testing
Bruce Cox & Jeremy Brown have contributed javascript code.

Bloom relies on the following open source works of others:

- Autofac
- CKEditor
- Gecko embedded browser: Mozilla
- GeckoFX a .NET wrapper around Gecko: Skybound Software, Tom Hindle (SIL International), and other contributors
- Ionic DotNetZip
- jquery.alphanum
- JSON.net
- Ghostscript
- LibTidy
- LongPress: Quentint
- ManagedTidy
- NUnit
- Palaso Library: SIL International and Payap Language Software, Eric Albright (formerly of SIL)
- PdfSharp: empira Software GmbH
- PortableDevice library from PodcastUtilities, Andrew Trevarrow and Derek Wilson (license)
- SynPhony: Norbert Rennert (SIL International)
- WebFX
- squirrel: Paul Betts
- Readium
- toastr

Thanks

To our colleagues who invested time in giving feedback and encouragement *before* Bloom became famous :-)

English

Michael Cochran, Jon Coombs, David Coward, Paul Frank (SIL LEAD), Suzanne Hatton, Hannes Hirzel, Cambell Prince, Glenys Waters, Payap University Linguistics Institute (Chiang Mai, Thailand)

BrowserStack, for a free open-source subscription to their **amazing** multi-browser, multi-platform testing service.

JetBrains for free open-source licenses for:

- Resharper, which keeps our c# code clean and agile,
- TeamCity, which we use for continuous integration/builds,
- YouTrack, where we keep bug reports, and
- WebStorm, for editing html and javascript.

Microsoft, for donated licenses of Visual Studio.

Trello, which helps us organize ideas and plans.

Rally/Flowdock, for a free open-source license for FlowDock, where we keep in touch all day even though we are distributed all over.
